First prize in the University4Society bootcamp and ideaton

🎸 INTERESTS

- Basketball
- Swimming
- Watching Movie

📇 PROFILE

I am a driven and enthusiastic student studying computer engineering with a keen interest in frontend development and artificial intelligence. I have experience working with frontend technologies such as Javascript ,TypeScript,NextJs,and React Native,React and I am eager to learn and expand my skillset. In my free time, I enjoy creating projects independently and with my group of friends, which have allowed me to improve my software development skills and explore new technologies and frameworks.
